Quality & Compliance

HOW DO COSTCO MEMBERS KNOW OUR GASOLINE IS HIGH QUALITY?

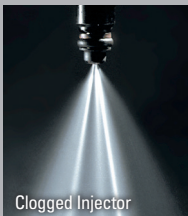

Unlike most other products, we never see the gasoline that we pump into our vehicle. Fuel is a trust purchase, which is why we call our fuel Kirkland Signature Gasoline. It's a name you can trust for value and quality.

Kirkland Signature Gasoline sold in the U.S. and Canada exceeds the TOP TIER™ performance standard, and is available in both regular and premium grades. In fact, it contains five times the U.S. EPA-required deposit-control additive. Our engine testing confirms that this level of additive keeps intake valves and fuel injectors free of harmful deposits.

See the Difference!

Clean Injector

Clogged Injector

Clean fuel injectors ensure complete combustion, better performance and lower emissions.

Kirkland Signature Gasoline cleans up existing deposits and prevents them from coming back – all at the same low price. That's Costco value.
